

Manufacturing

I'm IN

Through its strong industrial legacy Greater Manchester has emerged as a key UK location for both traditional and advanced manufacturing. The region's established manufacturing operations have moved up the value chain and become knowledge, capital and skills-intensive, leading the way in advanced engineering.

Greater Manchester's engineering base feeds into major national and global industry supply chains including aerospace, automotive, chemicals and energy.

Capitalising on the area's reputation as a leading engineering hub has helped Salford attract global companies including BASF, Werit, Allied Filter Systems, Harland Machine Systems UK, PZ Cussons, OMEGA. As well as recent investments including Nulife Glass, whose million pound investment in their new operation in Irlam to remove lead from CRT glass screens as well as Salford's Business of the Year 2012 Mettler Toledo Safeline.

SPECIALIST SUPPORT

- **The Manufacturing Advisory Service** is designed to help the manufacturer, streamline processes, reduce waste, become more energy efficient and generally improve business
- **The Manufacturing Institute** is an independent charity offering small and medium sized manufacturing companies in the North West FREE manufacturing reviews and support for projects to help them boost performance
- **Groundwork EBS** offers a wide range of professional services, designed to solve specific environmental and social objectives
- **The Carbon Trust** provides specialist support to business and the public sector to help cut carbon emissions, save energy and commercialise low carbon technologies

SECTOR OVERVIEW
